Work Experience

Aussie Broadband, Perth | Level 1 Technical Support | September 2024 – March 2025

- Delivered Level 1 support via phone, email, and live chat, resolving user issues related to broadband and connectivity, with strong emphasis on first-contact resolution.
- Diagnosed technical faults across cloud-based applications and desktop platforms, including packet loss, latency, and router configurations.
- Managed ticket queues using CRM tools and documented all interactions and troubleshooting steps clearly.
- Escalated unresolved or critical issues to senior engineers while providing detailed technical handovers.
- Contributed user feedback to improve support workflows and system stability.

AusTriathlon, Canberra | Performance Analyst | March 2024 – July 2024

- Provided live software and technical support during major sporting events to ensure seamless data tracking and reporting.
- Diagnosed technical issues with custom applications and internal systems, supporting the DevOps and analytics team.
- Assisted in creating user-friendly guides and system documentation to streamline onboarding and usage.

Nepal Oil Corporation, Nepal | IT Engineer | November 2019 – June 2022

- Led SAP S4 HANA implementation, coordinating configuration, training, and support across multiple departments.
- Maintained enterprise software systems, provided end-user training, and documented procedures.
- Resolved application and network-related support tickets, ensuring uptime and rapid issue resolution.
- Administered VPN, DNS, DHCP settings to ensure secure and consistent application access.

Education

Bachelor of Computer Networking and IT Security (Honors)

London Metropolitan University | 2017 – 2020

Modules: Networking, IT Security, Cloud Computing and Software Development

Certifications

- Microsoft Certified: Azure Fundamentals
- ITIL Foundation Certificate in IT Service Management
